

# Car Renting System - Project Proposal

## ***Project Title***

Car Renting System

## ***Group Name***

Code Nova

## ***Group Members***

1. Hafsa Nasir
2. Yusra Noor

## ***Problem Statement***

Finding and renting cars is often a time-consuming process where users have to manually contact rental services, check availability, and compare prices. Our system aims to provide a convenient and efficient platform to rent cars easily.

## ***Objectives***

- Provide an easy-to-use interface for customers to rent cars.
- Allow customers to search cars based on model, price, and availability.
- Manage rental records for both customers and administrators.
- Automate the booking and returning process.

## ***Key Features***

- User login and registration
- Car availability checking
- Booking and return system
- Payment management (simulation)
- Admin panel to add/update/remove cars

## ***Tools & Technologies***

Programming Language: C  
Platform: Command Line Interface (CLI)  
Version Control: GitHub
